## *PROPHY POLISHING STRIPS*

These dental polishing strips feature two levels of granularity on a single strip, making them a convenient and versatile choice for clinical use. Designed to easily slide between teeth, they help open contact points for polishing while protecting adjacent surfaces. These strips are ideal for refining and finishing restorations, removing excess material, and smoothing interproximal areas.

### *ADVANTAGES:*

- Dual-grit design for efficiency
- Easy access to interproximal areas
- Smooths and finishes restorations
- Removes excess material with precision

**Prophy Strips – Pack of 50**
