PERFECT GINGIVAL BRUSHES

The Perfect Gingival Brushes are a practical applicator designed to simplify the placement of gels and liquids during treatments. Its fine white bristles deliver accuracy while evenly spreading whitening agents, fluoride, desensitizers, and other gel-like solutions. Built with non-linting, non-absorbent fibers, the brush holds more material to reduce reloading and speed up application. The flexible stem can be bent to reach difficult areas, making it easier to achieve consistent coverage and reliable results in every procedure. Each pack includes 100 applicators, offered in your choice of pink or blue.

ADVANTAGES:

- Precise application
- Flexible design
- Clean results
- Efficient use
