

WONDERGLOSS
Model Shine

Wonderglass is a model shine used to provide dental stones and plasters with a high shine luster for that professional quality look when presenting models. It prevents staining and chipping of models. It works on all dental stones and plasters from orthodontic models to the practical models in the dental laboratory and dental office. Wonderglass only adds less than (1) micron of thickness to the stone or plaster so accuracy and quality are maintained. **It is not a dip or soap.**

ADVANTAGES:

- Provides dental stones and plasters with a high shine luster
- Prevents staining and chipping of models
- Works on all dental stones and plasters
- For use in dental laboratories, dental offices, and orthodontic offices
- Adds less than (1) micron of thickness to the stone or plaster

Item# 150 (32 fl oz / 946 ml)
