

ADHESIVE TIP APPLICATORS

These adhesive tip applicators provide greater control when handling small restorations. They are designed to securely pick up and position ceramic veneers, crowns, inlays, orthodontic brackets, and other small components while minimizing slipping and improving placement accuracy. The specially engineered tip delivers a reliable hold during placement and releases cleanly without leaving residue. Built for efficiency and ease of use, they help streamline workflows and reduce the risk of dropping or misplacing delicate items compared to traditional forceps.

ADVANTAGES:

- Accurate placement
- Reliable durability
- Clean release
- Versatile use
- Precision tip design

Adhesive Tip Applicators – Pack of 20
